patient paths

CliniCenter.  
caseDok.

path- and date  
management

...for more time with the patient.

## PURPOSE & FUNCTIONALITY

The purpose of the KCC HIS „CliniCenter“ is to support the whole patient flow with its processes at its best.

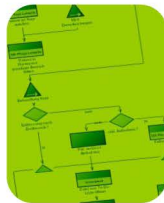

CliniCenter is divided in several program components which are linked optimally. The integration ability and the modular structure make also the use of some „stand-alone“ components possible.

- ... MedDok - medical documentation
- ... CareDok - care documentation
- ... CaseDok - path- and date management

### PROGRAM COMPONENTS

CaseDok is fully integrated into the HIS-environment and supports the documentation of the whole outpatients embedded into the medical case of a patient:

- scheduling
- registration
- research
- activity recording
- diagnosis
- appraisal
- Treatment plan (clinical path)

## support of the whole process of treatment

## INFORMATION AND OVERVIEW

### FACTS

#### CaseDok...

- ... supports and simplifies the workflow of the outpatient area
- ... shows the daily processes of the outpatients
- ... displays the whole date management
- ... provides a better quality of treatment
- ... is an efficient planning tool

## WEEKLY VIEW OF A REPORT

### PLANNING ASSISTENT

The planning assistent automatically lists all dates where all required resources are available (work station, attending doctor, patients).

It is possible to define when a run of dates starts, how many dates the run includes (this can also be automatically taken from master data—if deposited) as well as on which days of the week the dates shall be—separated into morning and afternoon. Therefore individual desired dates can be arranged without additional efforts.

### medical paths

It is possible to plan, coordinate and edit the paths of treatment including the individual provided treatment centres and their services in the hospital. This is possible for the current stay as well as for (several) after treatments. Scheduling and path planings of the wards are fully integrated and displayed—comprehensible and tight!

### TIMETABLE

All dates (pre-, after treatment and councelling dates) are evident at a glance. For a better planning there are different views available, divided into work station, attending physician and patients.

For each type of deadline date there can be deposited an average duration as well as a maximum of fixed dates. Furthermore it is possible to fix working hours in the particular area and to impose a freeze. These specifications can also be done for individual attending physicians.

Electronical activity recording—all activities can be requested and confirmed directly on the date. Consequently a complete documentation of all patient related activities can be guaranteed and these activities can then be taken over for the settlement.
