 **CliniCenter.**
MedDok.

medical
documentation

...for more time with the patient.

PURPOSE & FUNCTIONALITY

The purpose of the KCC HIS „CliniCenter“ is to support the whole patient flow with its processes at its best.

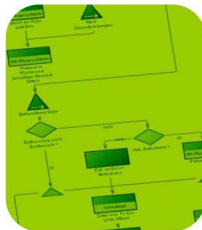

CliniCenter is divided in several program components which are linked optimally. The integration ability and the modular structure make also the use of some „stand-alone“ components possible.

- ... MedDok - medical documentation
- ... CareDok - care documentation
- ... CaseDok - path- and date management

MEDDOK PROGRAM COMPONENTS

MedDok is fully integrated into the HIS-environment and supports the documentation of inpatient medical processes as well as the documentation of activities of the jointly responsible custodial areas.

- medical state
- anamnesis
- fever chart including various yields (e.g. medication, vital signs, medical course)
- medication tool incl. order, preparation and application of the medicine

INFORMATION AND OVERVIEW

FACTS

MedDok...

- ... is fully integrated into the HIS and supports the inpatient documentation of the whole medical processes as well as the documentation of the jointly responsible custodial areas.
- ... can be set up on the database of the LKFcc and can use optional browsers of findings.
- ... contains the medical state including anamnesis, a separate medication tool as well as the centerpiece—the fever chart.

ADVANTAGES

general information

- can be set up on the database of the LKFcc and can therefore be integrated in every HIS environment.
- can use different browsers of findings
- patients list—patients are recorded according to the department of the user or usage of the patients list as activity schedule (performance requirements)

fever chart

- different possibilities of settings on the basis of departments or rather wards, users and patients
- integration of the performance requirements and the management of findings directly in the fever chart
- documentation of the activities of the jointly responsible fields of action—transfer to the calculation for the planning of nurse resources
- information of the medical course are automatically written into the multiprofessional team report

medication

- support of the whole process—from order via preparation to application
- separate documentation of the release of the dispenser
- setup of lockings (medicine, ingredients and/or active ingredients) on the basis of patient-ID's

medical state

- freely definable questionnaire
- pre-medication can be determined from the last stay and can then be transferred to the actual stay
